Objective

Dedicated and entry-level Programmer seeking an opportunity in the field of Information Technology. I possess knowledge in Infrastructure/DevOps, with various courses in Infrastructure as Code (IaC), Continuous Integration/Continuous Delivery (CI/CD), automation, networking and information security. Eager to apply and enhance these skills in a professional environment.

Professional Experience

June/2023 - Present

Itaipu Technological Park (PTI)

DevOps Volunteer

In this role, I have developed pipelines using GitLab to enable automated provisioning of production, development, and testing environments on Proxmox servers. Utilized tools such as Terraform, Packer, Docker, Ansible, and Shell scripting for efficient deployment processes.

Mar/2016 - Atualmente

Center for Zoonosis Control (Foz do Iguaçu)

Endemic Combat Agent

In this role, I have the opportunity to perform a variety of essential activities, including environmental inspections, property inspections, and active searching for individuals with suspected arbovirus infections.

Tecnologies

- Terraform
- Packer
- Docker
- Ansible
- CI/CD pipelines
